

Commission Agenda Report

City of Kalamazoo

TO: Mayor Hopewell, Vice Mayor Knott, and City Commissioners

FROM: James K. Ritsema, ICMA-CM, City Manager

REVIEWED BY: James J. Baker, PE Public Services Director and City Engineer

PREPARED BY: Stephen A. Skalski, PE, Assistant City Engineer – Water Resources

DATE: 5/29/2019

SUBJECT: Professional Engineering Services – 2019 PFAS Contamination Response Project Bid Ref# 906-29-017/TJ

RECOMMENDATION

It is recommended that the City Commission approve a contract with Prein & Newhof, who is a prequalified vendor, for professional engineering services related to the 2019 PFAS Contamination Response Project, in the amount of \$113,900.00.

BACKGROUND

With the identification of PFAS contamination in well water in both Richland and Cooper Townships, the City has identified areas where the water mains and services can be expanded and connected to new customers to safe drinking water from the Kalamazoo Water System. The Michigan Department of Environment, Great Lakes, and Energy (EGLE) extended \$1,800,000 in grant money to the City of Kalamazoo to perform this work, provided the City of Kalamazoo contributes \$200,000 in matching dollars.

Public Services reached out to Prein & Newhof to request a quote for professional engineering services related grant administration, design and construction services for the proposed water system work. Prein & Newhof quoted a fee of \$113,900.00 for the work. Public Services has been very satisfied with Prein & Newhof's work on previous projects, and recommends approval of this contract.

POLICY CONSIDERATIONS

Funding for this project is accounted for in the 2019 Water Streets Capital Improvement Budget.

COMMUNITY RESOURCES CONSULTED

This recommendation did not require advisory board consultation or additional public input.

FISCAL IMPACT

Funding for this project is accounted for in the 2019 Water Streets Capital Improvement Budget.

ALTERNATIVES

The City Commission could chose to delay or cancel this project, although this is not recommended.

Kalamazoo, MI 49007

RE: Fiscal Year 2019 Contamination Response Project

Dear Steve:

We have been assisting the City with the Fiscal Year 2019 application for the State of Michigan Drinking Water Revolving Fund (DWRF). The first DWRF application (started in fall of 2018 for funding in the Fiscal Year 2019) included three project areas:

1. Connection of homes (to existing public water mains) in Cooper Township who currently get their water from their private wells and are affected (or may be affected) by PFAS contamination.
2. Lead service replacements in the City of Parchment
3. Extension of water mains in Richland Township on CD, 35th, and D Avenue

Although all three project areas were originally part of the FY 2019 DWRF project, the State of Michigan initiated a new Contamination Response Grant program to be used to fund portions of the proposed FY 2019 DWRF project. It was determined that the Cooper Township water service connections and the Richland Township water main extension would be funded under the new Contamination Response Grant program. We have prepared and submitted the final FY2019 Contamination Response project plan with that funding adjustment.

In anticipation of the proposed project areas last fall, we had the project areas in Parchment, Cooper, and Richland flown for aerial mapping to reduce the overall topographic acquisition costs. We then performed ground control for the aerial mapping and will need to perform some supplemental survey to locate items not identified from the aerial mapping (i.e. water valves, culvert inverts, etc.). It is our understanding that the City has a current water service contract with a contractor and that the proposed water service work in Cooper Township will be made as an extension to that contract. No new project bid documents will need to be prepared for the Cooper Township work. However, for the Richland water main extension, we will complete the geotechnical work, prepare design plans, submit the required construction permits, prepare, bidding documents, and assist the City with bid evaluation.

Based on the scope of work already performed and proposed for design of the estimated \$2,338,250 of water system improvements, we offer the following service fee breakdown:

Aerial Mapping and Topography: \$10,100

Contamination Grant Project Plan Compilation and Submittal: \$17,500

Geotechnical Borings: \$6,800

Design, Permitting, Construction Documents: \$69,500

Grant Administrative Assistance: Allowance of \$10,000

Total Proposed Budget of \$113,900

Please let me know if you have any questions or require additional information.

Sincerely,

Prein&Newhof

Brian G. Vilmont, P.E.
