

City Commission Agenda Report

City of Kalamazoo

Date: **2/3/2020**

Item: **F.2.**

TO: Mayor Anderson, Vice Mayor Griffin, and City Commissioners

FROM: James K. Ritsema, City Manager
Prepared by: Sean R. Fletcher, Parks and Recreation Director

DATE: February 3, 2020

SUBJECT: Professional Service Agreement with Prein & Newhoff to provide engineering and design services for the Bank Street Farmers' Market (Bid Ref# 906-26-017.1.3)

RECOMMENDATION:

It is recommended that the City Commission approve a Professional Service Agreement with Prein & Newhoff, a pre qualified vendor, to provide engineering and design services for the Bank Street Farmers' Market project in the amount of \$174,000. Bid Ref# 906-29-017.1.3

BACKGROUND:

The Bank Street Farmers' Market planning has been ongoing for the past few years with the purchase of several properties making way for the realignment of Bank Street and parking to the south of the site. The past year has been spent refining plans and developing a phased plan for completing the market. Prein & Newhoff has been working with Parks and Recreation staff to develop a site plan that is "buildable" and within a reasonable budget. Construction of phase one will begin September 2020. Phase one includes a segment of the Kalamazoo River Valley Trail that will run along the west side of the realigned Bank Street, refurbishment of existing market sheds and a new shed along the western edge of the site, expansion and improvements to the restroom building, and some site work.

STRATEGIC VISION ALIGNMENT:

Relevant Priority Based Budgeting Program:

Farmer's Market

Access to Quality Recreational, Educational, and Cultural Opportunities - provides access to safe, clean and well-maintained parks, trails, green spaces, and open spaces and recreational facilities/areas that

meet the diverse needs and expectations of the community.

This program/project has a high degree of impact on the following Strategic Goal(s):

Inviting Public Places - Vibrant streets, exceptional parks, and welcoming activities.

COMMUNITY ENGAGEMENT:

Collaborate (two-way conversation) - the community will have a chance to shape the project by providing feedback.

The Parks and Recreation Department has worked closely with the People's Food Co-Op and Farmers' Market vendors to refine the plans for the market. A meeting with market vendors was held in November to obtain input about some of the finer details of the market based on the current plan. The meeting was attended by 26 vendors.

The concept rendering of the market site was on display at the final Farmers' Market held Saturday, November 23rd. Approximately forty people stopped to comment on the concept rendering and ask questions. **Each person that stopped to view the rendering was very excited about the improvements. This direct form of engagement with Farmers' Market visitors was very beneficial for staff and the visitors themselves.**

FISCAL IMPACT:

The fees for design and engineering services include geotechnical investigation, site layout and landscape architecture - design and construction documents, site civil engineering - design and construction documents, and bidding and construction documents.

The aforementioned services will be billed on a time and materials basis estimated at \$174,000. If the project scope or construction budget changes, the fee will adjust accordingly.

Funding for architectural and engineering services is available in the Farmers' Market project #cip0300057 2019 Capital Improvement budget.
