SUBJECT: Professional Service Agreement with Prein & Newhof for City-wide Stormwater Condition Assessment (Bid Ref#92500-002.0.9)

RECOMMENDATION:

It is recommended that the City Commission approve a Professional Services Agreement with Prein&Newhof for a City-wide Stormwater Condition Assessment in the amount of \$287,000.00.

BACKGROUND:

The City of Kalamazoo Department of Public Services uses detailed data to examine the need for improvement of City-owned infrastructure such as streets, bridges, water, and wastewater. However, there is a lack of information needed to effectively manage public stormwater assets that keep city streets operational, protect residents from floods, and improve the environment.

In order to effectively allocate funds to improve the City's stormwater system, it is necessary to complete an analysis of existing conditions of stormwater assets. This would begin with the inspection of 3,900 manholes along the City's mainline sewers and the pipes connected to them. The proposal from P&N also includes footage of 640 structures previously accessed, structure condition assessment, minor adjustments to utility maps if needed, and analysis of pipe and structure Risk of Failure and Criticality.

After this assessment is complete, the City will use the results to determine where to further investigate pipes via in-line televising inspection, and where to recommend future projects to improve stormwater infrastructure.

P&N has previously worked with the City of Kalamazoo on a wide variety of infrastructure projects, including the process of mapping the City's stormwater asset inventory. Public Services

reached out to request a quote for professional inspection services. P&N quoted a not-to-exceed fee of \$268,000.00 for the work. Public Services has been satisfied by P&N's work on previous projects and recommends approval of this contract.

STRATEGIC VISION ALIGNMENT:

Strategic Goal Impact:

Safe Community
Connected City
Economic Vitality
Good Governance
Environmental Responsibility

COMMUNITY ENGAGEMENT:

Appropriate Depth of Engagement

Inform (one-way conversation) – no feasible alternatives available due to legal/regulatory restrictions, standards and best practices, or resource limitations; the community will be made aware of the project.

FISCAL IMPACT:

Funding:

\$287,000.00

Project Costs:

Stormwater Condition Assessment	\$268,000.00
Allowance for Mapping Updates	\$19,000.00
Total Cost	\$287,000.00
