SUBJECT: Professional Service Agreement with Wightman and Associates for the design of Kalamazoo Avenue Two-Way Conversion (Bid Ref#92549-001.0.11)

RECOMMENDATION:

Approve a Professional Service Agreement with Wightman and Associates for the design of Kalamazoo Avenue Two-Way Conversion in the amount of \$955.035.

BACKGROUND:

For nearly 50 years the City of Kalamazoo has discussed and debated its one-way Downtown Street network. With the clear input from Imagine Kalamazoo 2025, control over our streets from the 2019 jurisdictional transfer, 2019-20 Street Network Design project input, and engineering reports supporting the resulting community vision, we are now poised to begin work on this long-standing goal. The first major construction project of this transformation effort is Kalamazoo Avenue between Harrison Street and Douglas Avenue.

This multi-year project is the first of several projects that will eventually see the conversion of Michigan Avenue, Lovell, Main, and South Streets to two-way operation and redesign of Stadium Drive, Michikal, Westnedge Avenue, and Park Street. These changes meet the community's goals of streets that are safe and comfortable for all users. This work will have a profound impact on economic vitality in and around Downtown and reconnect the Downtown with adjacent neighborhoods.

Besides these benefits, the resulting changes in the City's Street network will significantly transform how residents and visitors allocate and use street space and view development along their streets. More than a generational change, and even more than a once-in-a-lifetime opportunity, these projects will repair a damaged and inadequate transportation network and

provide a modern framework for our community to develop and prosper. In addition to these changes, the City will also be taking the opportunity to upgrade water main along this corridor.

Four proposals were received by the deadline given to several pre-approved engineering consultants. A comprehensive project team was assembled to review and compare the proposals. Wightman's two-phase proposal totaling \$955,035 (Phase I-\$279,595 and PhaseII-\$675,440) was selected based on its conveyed understanding of the project scope, the firm's experience, and its project delivery abilities.

STRATEGIC VISION ALIGNMENT:

Strategic Goal Impact:

Shared Prosperity
Safe Community
Connected City
Economic Vitality
Good Governance
Environmental Responsibility

COMMUNITY ENGAGEMENT:

Appropriate Depth of Engagement

Public and Internal

Discussion:

Public Services and Community Planning Economic Development Departments have actively communicated through the lifespan of this project to date and will continue to do so moving forward. This design project comes following the conclusion of the preliminary design work done by CDM Smith. Public informational and engagement sessions will be held throughout the construction design process.

FISCAL IMPACT:

This contract is separated into two Phases. Phase 1 will be initiated first in 2022, with funding made available from excess project budgets. The City is seeking grant funding for the Phase 2, but has identified available budget from capital improvement budgets on hold that will be used to fund the Phase 2 until the grant determination has been made. If the grant is awarded, the grant will be brought forward for City Commission approval. Phase2 is likely to begin later in the 2022 fiscal year and extend to 2023.

Project Costs:

Design (Streets and Water Combined Costs)	Phase 1 \$279,595.00 mst0100288
	Phase 2 \$675,440.00
Total Cost	\$955,035.00
