SUBJECT: Approval of a professional service agreement with Prein & Newhof for E. Coli Sampling and Site Assessment-MS4 TMDL Monitoring Support (Bid Ref#92500-005.0.1)

RECOMMENDATION:

It is recommended the City Commission approve a professional service agreement with Prein & Newhof for E. Coli Sampling and Site Assessment-MS4 TMDL Monitoring Support in the amount of \$102,500.

BACKGROUND:

The City of Kalamazoo is implementing its MS4 Total Maximum Daily Load (TMDL) Monitoring Plan for E. coli as required by its NPDES Permit issued by the Michigan Department of Environment, Great Lakes, and Energy (EGLE). Prein & Newhof is a City-approved, Pre-Qualified Engineering and Consulting firm selected through the City's professional services qualification process and is currently included on the City's roster for stormwater and surface water management services. Their experience with municipal stormwater systems, regulatory compliance, and watershed-based monitoring supports the technical requirements of the City's MS4 permit obligations.

The objective of this project is to perform wet-weather testing at 66 locations meeting the criteria for sampling ≥ 30 -inch diameter outfalls during qualifying storm events. As outlined in the City's TMDL Implementation Plan. Monitoring locations include: Arcadia Creek, Davis Creek and Axtell Creek. Sampling will occur during Michigan's recreational season (May–October). Laboratory analysis will be conducted within the required 8–24 hour holding time. It is anticipated that three independent personnel will collect samples during qualifying events, requiring approximately seven storm events to complete all 66 sample locations.

Due to the number of monitoring locations, required rapid storm-event mobilization, and laboratory holding-time constraints for E. coli analysis, internal staffing and laboratory capacity

do not support full implementation of the 2026 MS4 TMDL monitoring plan.

Contracting professional services ensures:
Compliance with Michigan EGLE MS4 NPDES permit requirements
Fulfillment of TMDL monitoring obligations
Protection of surface water quality within the City's receiving waters
Accurate and defensible regulatory reporting

STRATEGIC VISION ALIGNMENT:

Strategic Goal Impact:

Safe Community- Creating a safe environment for living, working, and playing

COMMUNITY ENGAGEMENT:

Appropriate Depth of Engagement

Inform (one-way conversation) – no feasible alternatives available due to legal/regulatory restrictions, standards and best practices, or resource limitations; the community will be made aware of the project.

FISCAL IMPACT:

The funds required for this contract are \$102,500. The funding available and estimated costs are detailed below. We are requesting the approval of this purchase using the funds below.

Description	Account	Project #	Dollar Amount
Wastewater Fund	590-545-03.000-801.000		\$52,000.00
Wastewater Fund	590-545-05.000-801.000		\$50,500.00
