DATE: July 6, 2026

SUBJECT: Approval of a Professional Services Agreement with Hubbell, Roth & Clark Inc for Construction Engineering of the Portage St (Cork-Stockbridge) Safety Project (Bid Ref#92549-001.0.5)

RECOMMENDATION:

It is recommended that the City Commission approve a professional services agreement with Hubbell, Roth & Clark Inc for Construction Engineering services in support of the Portage St (Cork-Stockbridge) Safety Project in the amount of \$130,805.00.

BACKGROUND:

The City was awarded grant funding through the MDOT FY 2026 Safety Grant program for safety projects focused on improving conditions for Vulnerable Road Users, with an emphasis on pedestrian safety. The Portage St (Cork-Stockbridge) Safety Project is one of the awarded projects. Hubbell, Roth & Clark Inc (HRC) completed the design engineering and prepared bid-ready documents, and the project is being administered through MDOT's Local Agency Program (LAP).

The project will resurface Portage St from Cork St to Stockbridge Ave and convert the existing four-lane roadway to a three-lane configuration, often called a "road diet," with one through lane in each direction, a center left-turn lane, and bike lanes on both sides. This layout continues the three-lane configuration already in place on Portage St north of Stockbridge, creating a more consistent and predictable corridor for drivers, bicyclists, and pedestrians. Pedestrian safety improvements include solar-powered rectangular rapid flashing beacons (RRFBs) at several crossings, median refuge islands, curb ramps, pedestrian lighting and push buttons, decorative concrete pavement, and updated signing and pavement markings. Construction is anticipated in late summer or fall of 2026.

With construction approaching, the City requires construction engineering and oversight services to administer the project in accordance with MDOT LAP standards. HRC's proposal provides

full-time inspection, contract administration through MDOT's AASHTOWare Project Construction and Materials (APCM) system, construction staking and layout, construction material testing, and design assistance during construction over an estimated nine-week construction period. Because HRC designed the project and has delivered excellent results on the City's previous construction engineering assignments, Public Works recommends that HRC continue into the construction phase to ensure continuity and a smooth transition from design to construction. The not-to-exceed fee of \$130,805.00 represents approximately 12% of the estimated \$1,039,402.00 construction cost.

STRATEGIC VISION ALIGNMENT:

Strategic Goal Impact:

Safe Community- Creating a safe environment for living, working, and playing

Connected City - A City networked for walking, biking, riding, and driving

COMMUNITY ENGAGEMENT:

Appropriate Depth of Engagement

Inform (one-way conversation) – no feasible alternatives available due to legal/regulatory restrictions, standards and best practices, or resource limitations; the community will be made aware of the project.

The Portage Street corridor project has been shared with the public through the City's project webpage. Construction updates and notice to residents will continue throughout the construction phase.

FISCAL IMPACT:

The funds required for this professional service agreement are \$130,805.00. The funding available and estimated costs are detailed above. This agreement will be billed on an hourly, not-to-exceed basis in accordance with HRC's proposal. We are requesting the approval of this purchase using the funds above.
