

TO: Honorable Mayor and City Council

FROM: Laurence Shaffer, City Manager

SUBJECT: Stryker Way/Portage Road Traffic Signal and Intersection Project - Engineering Services

SUPPORTING PERSONNEL: Wm. Roger Buell, Director of Transportation and Utilities

ACTION RECOMMENDED: That City Council approve an engineering services contract with Wightman & Associates, Incorporated, in the amount of \$47,875 for the new Stryker Way/Portage Road Traffic Signal and Intersection Improvements and authorize the City Manager to sign all documents related to the contract on behalf of the city.

Stryker Instruments is currently constructing a 485,000-square-foot research and development facility on 288 acres of land bounded by Portage Road on the east, by Lovers Lane on the west, by East Milham Avenue on the north and by Ramona Avenue on the south. In conjunction with the construction of the new facility on this parcel, a new public street to be named "Stryker Way" will run from Portage Road to Lovers Lane. With the construction of the new road, a traffic signal and southbound right-turn lane will be constructed on Portage Road between Ramona Avenue and East Milham Avenue. The City of Portage received a grant through the Michigan Department of Transportation (MDOT) in the amount of \$259,605 for the construction of this new intersection. Engineering services and other costs not covered by the grant will be funded by Stryker Instruments.

The city requested a proposal from Wightman & Associates, Incorporated, of Benton Harbor, Michigan to provide engineering services for the project. The proposal includes assistance in bidding, construction engineering as well as contract and grant administration. Wightman & Associates has completed previous projects on Portage Road, both north and south, as well as the site plan and road work design for the adjacent Kenco development on Portage Road. Wightman & Associates also previously designed the section of Portage Road from I-94 to East Milham Avenue completed in 2014 and has extensive experience in working with the processes and procedures of MDOT. By selecting Wightman & Associates to complete engineering services, minimal time will be required by Transportation & Utilities staff to educate the consultant on the previous Portage Road projects, allowing staff to focus on city projects and maintain the current schedule. Wightman & Associates has submitted a proposal in the amount of \$47,875. This amount has been determined to be reasonable and consistent with similar projects.

The new street and intersection are being designed by consultants obtained by Stryker Instruments.

The previous experience of Wightman & Associates with the City of Portage and Portage Road projects is critical to ensure that the design meets city standards. They will be responsible for coordinating any plan revisions with the Stryker consultant. Wightman & Associates will assist with

bidding this project over the winter months once the plans have been approved, in addition to overseeing all work performed by the contractor and preparing all necessary MDOT documents once the contract has been awarded. Construction of the project is planned for June 2018.

Therefore, it is recommended that City Council approve an engineering services contract with Wightman & Associates, Incorporated, in the amount of \$47,875 for the new Stryker Way/Portage Road Traffic Signal and Intersection Improvements and authorize the City Manager to sign all documents related to the contract on behalf of the city.

FUNDING: Funds in the amount of \$47,875 are available in the Major Street CIP Account.

**RE: PROPOSAL FOR PROFESSIONAL ENGINEERING SERVICES
STRYKER WAY INTERSECTION IMPROVEMENTS**

Dear Vicki:

We would like to thank you for requesting a proposal from our firm for professional engineering services for the above referenced project. After our meeting on June 19, reviewing the supplied construction plans and specifications, and our knowledge of Portage Road we would like to offer the following proposal.

Section I – Project Goals

WAI understands the City of Portage has received Category A funds through the Michigan Department of Transportation (MDOT) for the installation of a new traffic signal and south bound right turn lane at the future intersection of Stryker Way and Portage Road. This intersection is located across from the Kenco Industries south drive entrance. The work is slated for spring/summer 2018.

The signal and intersection plans were prepared by the developer's Engineer for the site. The City desires assistance with the bidding, construction engineering, and contract administration phases of the project which fall under the Category A grant.

Based upon the above understanding and roles, we have prepared the following scope of services and fees.

Section II – Scope of Services

Based upon the above project goals, WAI proposes the following description of services to be performed.

- **Bidding Services** – WAI will assist the City of Portage in finalizing the bid package into a format suitable to the City of Portage and MDOT. This will include the following services.
 - Review plans and specifications prepared by developer's Consultants
 - Coordinate plan revisions
 - Verify plan quantities
 - Prepare and submit a draft package to Purchasing for review
 - Obtain current State prevailing wage rates and verify status immediately prior to bid opening
 - Place bid advertisement in local newspaper, one Sunday edition (publication fee included)
 - Place plans and specifications with local plan rooms, post on WAI website, and provide City with electronic and hard copy sets for their use.

- Respond to Contractor inquiries and issue addendum as necessary
 - Attend bid opening and prepare bid tabulation
 - Assist City in providing a recommendation to City Council
 - Assist City in preparation of contracts
- **Construction Engineering** – Once the Contract has been awarded, WAI will begin the construction engineering phase of the project. This will include the following services
 - Full-time resident project representative during critical work, and part-time during non-critical phases (4 weeks full-time/1 week part-time).
 - Schedule and attend pre-construction meeting and distribute minutes.
 - Attendance at bi-weekly progress meetings (2 each)
 - All required construction staking
 - All MDOT required materials testing including concrete, aggregates, density, HMA, and anchor bolts
 - Preparation and maintenance of Field Manager and paper files in accordance with MDOT, including but not-limited to shop drawing review, wage rate interviews, IDRs, and material documentation.
 - Preparation of bi-weekly pay estimates
 - Attendance at final inspection and walk-through
 - Project close-out

Section III - Fees

All services described herein would be performed at a **Guaranteed Maximum Fee of \$47,875**. All services would be invoiced on a monthly basis with payment due within 30 days.

Section IV – Schedule

We understand that the City of Portage is proposing to bid the project over the winter with construction to occur in the spring/summer of 2018. Once we have received the formal notice to proceed we would be glad to sit down with the City of Portage to lay out a detailed schedule to meet any specific timeline or critical dates that would need to coincide with the completion date of the adjacent private development.

City of Portage

Thank you again for requesting a proposal from our firm for this project. If our proposal is acceptable, please sign and date where indicated below and return one copy of this proposal to us. We look forward to again working with the City of Portage. Should you have any questions or comments or wish to further discuss our proposal, please do not hesitate to call me.

Very truly yours,

WIGHTMAN & ASSOCIATES, INC.
